

How to Spot Fake HIV Medicines

1. Refill medication before running out of the previous prescription.

2. Then compare:

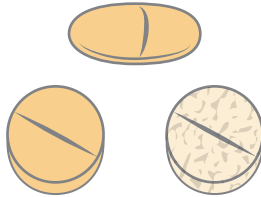

Do the bottles **LOOK** the same?

Does the **PACKAGING MATCH?**

Are the pills the **SAME COLOR?**
SAME SIZE?

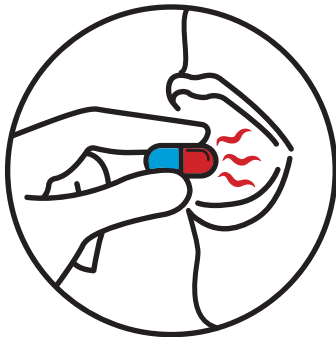

Do the pills have the **SAME MARKINGS?**

3. Ask yourself:

Does the medication **TASTE** or **FEEL** **DIFFERENT?**

Are you **NOT RESPONDING TO TREATMENT** as you normally would?

Your medicine might be COUNTERFEIT.
First talk to your pharmacist,
then the authentic manufacturer.

Limit your exposure to counterfeits.
Don't order medicines from
foreign or fake online pharmacies.
